

S E R I E S

Complete precision cleaning.

The i³ Dry Ice Blast Cleaning Series utilizes Cold Jet's patented shaved ice and feeder technology. Both our pneumatic and electric options deliver a comprehensive and precise cleaning solution for delicate substrates. No other system on the market cleans so powerfully, yet so gently.

Cold Jet's patented feeder technology creates shaved dry ice on demand.

While pellets are most suitable when removing heavy, thick contaminants, shaved ice is ideal for cleaning delicate substrates, intricate geometries or tiny openings.

Powerfully delicate.

Cold Jet's patented block shaving technology utilizes block dry ice pressed against small rotating blades that shave the block into snow-like particles, perfect for cleaning delicate substrates or intricate geometry.

i³ MicroClean

When precision counts, the single hose electric i³ MicroClean is your best choice. It cleans small, complex cavities and crevices that other machines can't reach without surface abrasion, disassembly, or harmful secondary waste.

SDI-5

Our dual hose, pneumatic SDI-5 is a low pressure blast cleaning system that uses dry ice block, pellets, or nuggets. Flexibility with dry ice media and our patented shaved ice and feeder technology combine to tackle a wide range of tricky cleaning applications.

SHAVED DRY ICE BLASTING

i³ IcePress

Small, mobile and easy to use, the pneumatic i³ IcePress is a perfect companion to our shaved ice blasting systems. It can re-form pellet or scrap ice into block in less than 3 minutes – that's 20 high quality dry ice blocks per hour.

Superior performance.

Cold Jet nozzles are designed to deliver superior performance whatever the application. Broad or precise cleaning, hard to reach areas or working in a confined space, our line of nozzles will exceed your expectations.

i³ MicroClean nozzles are designed to minimize air consumption while providing maximum precision cleaning performance.

The wide array of SDI-5 nozzles can handle any cleaning challenge, and stingers can be changed to alter blasting aggression.

Aerodynamically-Tuned Hoses

Our proprietary hoses eliminate constrictions, delivering more cleaning energy for the most powerful and efficient cleaning capability.

Ergonomic Applicators

Cold Jet applicators reduce user fatigue while our proprietary coupling system makes connecting and disconnecting nozzles and hoses fast and easy.

Specially-designed applicators improve the blasting experience.

Everything you need to do the job right.

Enjoy immediate response time, an extensive parts and accessories selection, 1-year factory warranty on all systems, comprehensive training, experienced service technicians, and 24/7 global support.

Protect your investment with a Cold Jet Extended Warranty Plan. Visit coldjet.com/support for more info.
