

Pure. Clean.

This is Cold Jet.

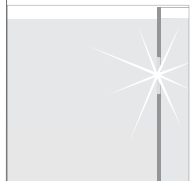

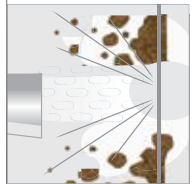

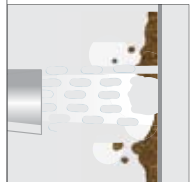

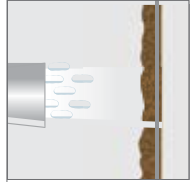

Cold Jet is the global leader in dry ice blast cleaning and production technology. Our environmentally responsible cleaning systems eliminate the use of solvents and other waste-generating cleaning processes. Our commitment to satisfaction keeps us on the leading edge while always delivering a clean (and green) like you've never seen before.

Dry Ice Blast Cleaning

From gently restoring smoke damaged books, to cleaning multi-million dollar production equipment in place – Cold Jet's range of dry ice blast cleaning systems, nozzles and accessories sets the industry standard in meeting your industrial cleaning challenges.

How dry ice blast cleaning works:

Dry Ice Production

Cold Jet's extensive line of dry ice production equipment makes premium pellets and nuggets on demand, or in a continuous 24/7 operation. Our systems are engineered to deliver the purest ice with the longest shelf life and superior blast cleaning capability.

Custom Solutions

Cold Jet integrates the most innovative and reliable dry ice production equipment with state-of-the-art blast cleaning systems. From custom accessories to fully automated cleaning systems, our experienced engineers tailor solutions to meet your specifications.

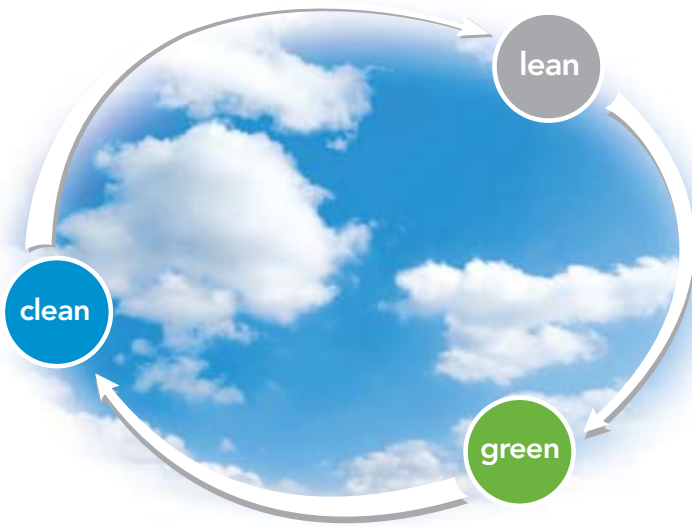

Instead of abrasive media that can damage surfaces, Cold Jet uses dry ice (solid CO₂) accelerated at supersonic speeds to create mini-explosions that lift contaminants from substrates. The CO₂ then sublimates (vanishes into thin air) leaving no secondary waste.

World Class Customer Service

Enjoy 24/7 global support, comprehensive training, and immediate response from our team of experienced service technicians. All systems come with a 1-year factory warranty, and a wide selection of parts and accessories to choose from.

The purest ice, the cleanest clean.

Cold Jet innovation offers powerful, environmentally responsible dry ice blast cleaning and production solutions that reduce operating cost, improve production quality and increase productivity.

Cold Jet eliminates secondary waste, saving cleanup time and expense.

clean

- A superior clean on the first and every pass.
- An effective cleaning alternative to sand, soda, and other abrasive blasting media.
- Approved by the FDA and USDA.

Dry ice sublimates quickly (transforming from a solid to gas without becoming liquid) leaving equipment and electrical parts clean and dry.

lean

- Enhances Six Sigma, 5S and Total Productive Maintenance (TPM).
- Improves production quality by reducing defects due to dirty equipment.
- Eliminates secondary waste and time consuming cleanup.
- Prevents unnecessary downtime by cleaning hot and in place.

green

- Completely safe and non-toxic.
- Produces no secondary waste.
- Approved by the EPA.

Dry ice does not produce or add CO₂ to the atmosphere and therefore does not contribute to the greenhouse effect.

Over 30 industries, hundreds of applications, and a world of experience.

The power of Cold Jet Dry Ice Innovation brings winning solutions to a diverse list of industry leaders around the globe:

- Aerospace
- Automotive
- Contract Cleaning
- Electronics
- Food Processing
- Foundry
- Industrial Gas
- Manufacturing
- Packaging
- Printing
- Refrigeration
- Restoration
- Rubber & Plastics
- Utilities

Comprehensive, safe cleaning at a fraction of the time and cost.

Traditional cleaning methods usually require a hammer, chisel, hazardous chemicals and significant labor – turning even the most minimal preventive maintenance effort into a major disruption. Cold Jet can change all that.

Solvents

Sand Blasting

Scrubbing

Hammer & Chisel

Save up to 80% over traditional cleaning costs.

Value. Expressed.

Designed to use less air, less ice and less manpower, our systems have a lower cost of ownership than any other system on the market and offer ROI in 3 to 9 months on average, and in some cases much less.

1 man, 1 hour, 100 ft hose – that's one amazing clean.

Join the worldwide industry leaders already taking advantage of Cold Jet's innovative technology.
