

AeRO 75

The AeRO 75 patented aero dynamic rotor and pad design assures high reliability and smooth pulse-free blast flow at all blast pressures and media flow ranges for greater operator comfort, faster cleaning, and less waste.

Enhancements to the single-hose radial feeder technology includes a simpler and more durable mechanism that can, if necessary, be serviced by untrained personnel. And with Cold Jet's 24/7 customer support, you'll get the answers you need when you need them.

Cold Jet offers the widest selection of environmentally friendly dry ice blasting systems, nozzles, and accessories providing solutions to customers worldwide.

- ① Nozzle hanging device keeps nozzles safely stored on machine
- ② Hose hanging devices keep hoses safely stored on machine
- ③ Fork lift tubes ensure balance and safety

Visit www.coldjet.com to learn more about the AeRO 75.

SYSTEM INCLUDES

- One length of blast hose
- Air Hose
- Customer Specified Applicator
- Customer Specified Nozzle
- Nozzle Handle (if applicable)

SAFE

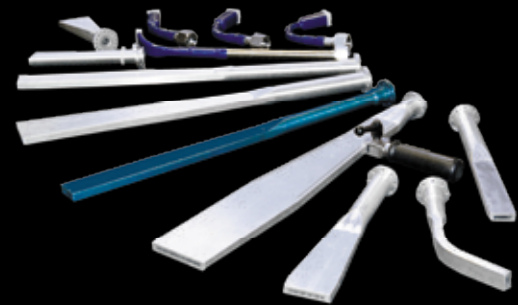

- Air bleed valve adjacent to air connection
- Hopper lid opens for easy filling of ice
- Sliding screen design with safety interlock

EASY TO USE

- Controls are simple and easy to use
- Hopper ramrods prevent media clumping
- Hour meter

SPECIFICATIONS

- Large, fully isolated hopper
75 lb (34 kg) capacity
- Variable feed rate: up to 7.1 lb/min
(up to 3.2 kg/min)
- Low pressure system - up to 140 PSI
(up to 9.7 bar)
- Weight - 315 lb (143 kg)
- Size (L x W x H) - 37" x 20" x 40"
(94.6 cm x 51 cm x 101.6 cm)
- Power requirements:
100-140 VAC, 1 PH, (50/60 Hz), 9 amps, or
200-240 VAC, 1 PH, (50/60 Hz), 4.3 amps
- 12-month warranty
(extended packages available)
