

Industry Overview: Automotive

Reduce cleaning time by as much as 70%

A Faster, Better Clean.

Cold Jet dry ice cleaning has helped Automotive companies cut their mold-buildup cleaning costs by as much as \$50,000 per year. Cold Jet's non-abrasive dry ice cleaning systems easily remove excess grease, sludge, sealant and weld slag from equipment. Dry ice blast cleaning is faster and more effective than traditional cleaning methods, in part, because it does not generate any secondary waste or leave any residual blasting media to clean up or dispose of.

Discover Cold Jet.

Contact Cold Jet today to speak with an industry expert and choose the best cleaning solution for your application. Call **1.800.337.9423** or visit us online at www.coldjet.com to learn more.

APPLICATIONS

- Core Box
- Permanent Aluminum Mold
- Paint Hook
- Weld Line
- E-coat
- Blow Mold
- Compression Mold
- Injection Mold
- Urethane Mold
- Transmission Housing

KEY BENEFITS

- Reduce labor cost
- Reduce scrap
- Increase productivity
- Increase operator safety
- Non-abrasive process
- No secondary waste stream
- Environmentally responsible

RESULTS

Cold Jet vs traditional cleaning methods.

CLEANING METHOD	NO SECONDARY WASTE	NON-CONDUCTIVE	NON-TOXIC*	NON-ABRASIVE
Dry Ice Blast Cleaning	●	●	●	●
Sand Blasting		●	●*	
Soda Blasting		●	●*	
Water Blasting			●*	●
Hand Tools	●		●	
Solvents/Chemicals				●

* Upon contact, traditional blasting materials become contaminated when used to clean hazardous substances and objects. These blasting materials are then classified as toxic waste and require appropriate safe disposal.
