

WELD LINE

Better Welds = Less Scrap and Downtime

Weld slag, spatter, resin, smoke, oil and dampening adhesive builds up on production equipment. This causes misalignment and can prevent the proximity switch from firing in the appropriate spot. The robot stops welding or welds incorrectly, creating scrap and causing equipment failure and production downtime. "No contact" dry ice blasting provides an effective and economical removal solution for slag and spatter build up.

KEY BENEFITS

- Reduce scrap rates
- Reduce fixture repair
- Reduce replacement costs
- Environmentally responsible
- Minimize downtime
- Maximize tooling life
- No secondary waste
- Non-abrasive; won't damage sensors
- Clean online; no cool down required
- Replaces ineffective and costly labor intensive cleaning methods
