INTEGRATED DOSING IN 3 STEPS

1. PROGRAM AMOUNT OF DRY ICE:

Using HMI screen, program the amount of dry ice per parcel

2. PARCELS LOADED WITH DRY ICE:

AUTOMATED:

The parcels are positioned on a scale to validate accurate dosing

MANUAL:

Operators can engage dosing by the push of a button or foot pedal

3. NEXT PARCEL IN QUEUE

Parcels can be automatically (or manually) shuttled down the line to the next process

BECKHOFF INDUSTRIAL HMI

Intuitive control system offering permission based accessibility and programming for automation

SIDE HINGED FRAME

Easily engage/disengage dosing unit for precise parcels dosing or mass production for totes

EXTRUDER PLATE CHANGER

Automatically switch between extruder plate sizes to minimize downtime and waste

SUREFLOW DOSING

Thumpers and vibrators provide reliable dosing and clog-free operation
