

FACILITY MAINTENANCE

Reduce cleaning time and production line disruptions

Dirt, soot, grease and oil buildup in production facilities causes machinery to function improperly and can create an unsafe working environment. Effective cleaning extends the life of electric motors, reducing or eliminating costly repairs, replacement or rental programs. However, manual cleaning is often delayed to prevent production line shutdown. Dry ice cleaning provides a quick, safe and economical solution that allows equipment to be cleaned in-place without disassembly or cool down.

KEY BENEFITS

- Reduce cleaning downtime
- Environmentally responsible
- No secondary waste
- Eliminate wear and tear
- Non-abrasive process
- Clean in-place; no cool down required
- Enhances Total Productive Maintenance (TPM) programs

Cooling Fan
Conveyor
Forklift

General Equipment & Facility
Motor / Electrical Box
Pipes and Hoses

APPLICATIONS

Join industry leaders already benefiting from Cold Jet dry ice cleaning systems.
